

Product sheet:

## Professional CxH Model

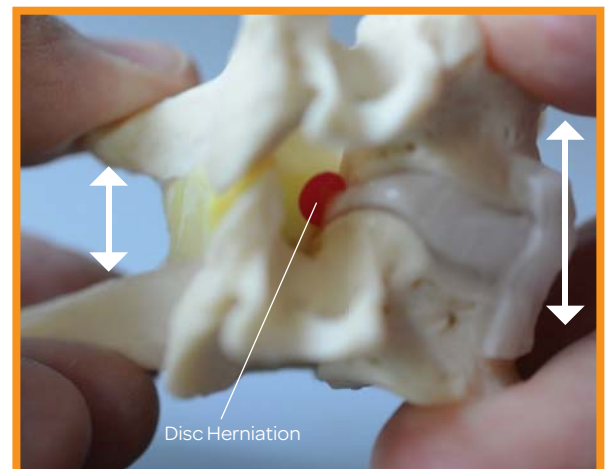

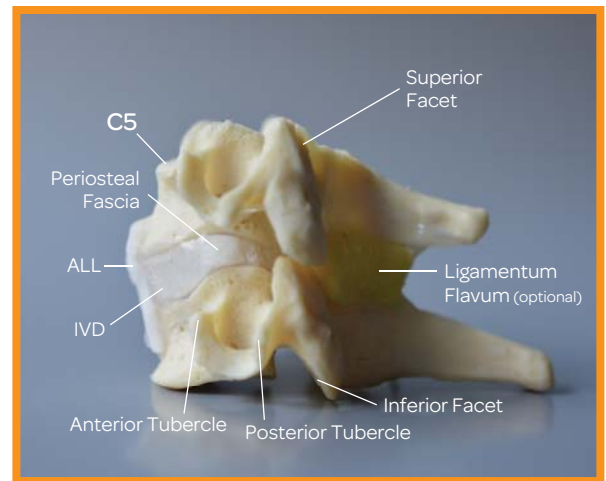

### Product Description

Use our Professional CxH Disc Model to take education to a higher level of understanding for cervical spine pathologies including disc herniation. This matching specimen to the Professional Lumbar LxH model (same human spine) portrays identical cervical size with natural morphology including a two-part intervertebral disc with six degrees of natural motion and a red post-lateral nuclear extrusion and migration upon manual compression. Posterior longitudinal ligament (PLL), anterior longitudinal ligament (ALL) and periosteal fascia (POL) (adjacent to uncovertebral joint) included. Ligamentum Flavum (LF) extra feature.

### Additional Information

#### Optional Feature—Professional CxH

Add Ligamentum Flavum for even more realism
